COOLING - HEATING CONTROLLER Model VD2FX V5

Read carefully these instructions before installing and using this device and keep them for future reference. Attention to installation and electrical wiring. Use this device only as described in this document and never use itself as a security device. The device must be disposed of in accordance with local standards for the collection of electrical and electronic equipment.

DESCRIPTION

VD2FX is a thermostat for cooling cabinets -with defrost control- or heating cabinets (bain-marie); Model VD2FX is suitable for all applications including the ones with antiexplosive standards; Room temperature is controlled with NTC or PTC sensor; NTC temperature range is -50÷+110°C and PTC temperature range is -50÷+150°C; Possibility to select a 2nd sensor - through a parameter - to control the evaporator. It has: 3 indication digits with resolution 0.5°C and 4 buttons; one digital input for controlling the cabinet's door; 2 relays: a main relay 30A 250VAC that is configured via parameter in operation: cooling or heating mode; The 2nd relay a is auxiliary SPDT contacts 10A 250VAC for controlling defrost or fan or lamp or alarm. It also, has a buzzer in case of an alarm; The device is mounted on a panel hole 29x71mm and it is restrained with plastic side brackets. Through the serial input it can be connected to a network either through Cloud IoT on the CORTEX platform, or through a computer in the CAMIN program for complete local recording and monitoring of the device.

INDICATIONS AND BUTTONS FUNCTION

Display indications			
*	relay ON in cooling mode		
- *	relay ON in heating mode		
S	auxiliary relay ON		
**	defrost ON		
Ø	ECO mode		
\triangle	alarm ON		
*	malfunction ON		

	Keyboard				
	←	enter/exit the parameter's menu			
	SET (SET)	display the parameter's value enter parameter's value manual defrost			
	*	ON/OFF lamp display second temperature T2			
	₩	mute buzzer ON/OFF ECO function			

For more indications regarding the <u>alarms</u> please see the alarm's table at page 4.

ADJUSTING TEMPERATURE - SET POINT

- Press to display the first parameter SPo.
- Press to display its value. With or change **SPo** value.
- Press to save the new value. The device is working with the new adjustment.

INDUSTRIAL FACTORY SETTINGS

- Press to display **SPo**. Press once and the parameter **Cod** is displayed.
- to display its value and press to enter the appropriate value. Press 2.
- again to exit the parameter menu, 'YES' is displayed on screen All appropriate factory settings are now stored in the device.

ON/OFF LAMP

To activate or deactivate the lamp, press

ON/OFF ECO FUNCTION

To activate or deactivate the ECO function, press . During ECO start-up and for parameter OAU = 4, lamps turns OFF. To turn it back on, press

MANUAL DEFROST

Press to start a manual defrost with duration based on the parameter dd2.

PROGRAMMING A PARAMETER

ATTENTION: to gain full access to the parameter's menu, the 2nd parameter **Cod** must be adjusted to **22** (see parameter table page 2).

- Press to enter the parameter menu.
- Choose the parameter you want to adjust by pressing or and press to display its value.
- Press or to change its value and then press to store the new value.
- Press to exit the parameter menu.

TECHNICAL SPECIFICATIONS

Models VD2FX power supply: 230VAC 50/60Hz / Maximum power consumption: 3W. Model VD2FXW switching power supply 100-264VAC 50/60Hz 5W.

It is recommended using a power supply safety fuse: 0.5A (not included)

Room and evaporator temperature sensors NTC 10K 1% 25°C IP68 and temperature range -50÷+110°C (-58÷+230°F) or PTC 1K 25°C and temperature range -50÷+150°C (-58÷+302°F) - not included - / Accuracy: ±0.5°C

Alarm buzzer / Serial input with 5pin connector / Digital input door

1st Relay cool/heating 30A res. 250VAC normally open contact / 2nd Relay auxiliary 10A res. 250VAC SPDT contacts / Max current load on terminal blocks 18A Connections: cable cross section 2.5 mm² for all relays / cable cross section from 0.25 to 1.0 mm² for the sensors and door switch

Connections with terminal blocks 18A using cable with cable cross section up to 2.5 mm² / It is recommended using a torque wrench with maximum torque 0.4Nm Operating temperature: -15÷+55°C / Storage temperature: -20÷+80°C

Dimensions 37x79x81mm / The device is mounted on panel hole 29x71mm and restrained with plastic side brackets / Protection IP65 front

Firmware: V5.0.6

SERIAL INPUT

VD2FX connects via serial input to the following options:

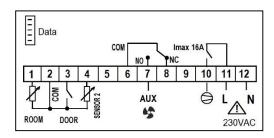

- Cloud and CORTEX platform via mobile app: connection to the cloud and the CORTEX platform for monitoring recording and managing the thermostat from your
 mobile, tablet or any computer, notifications via email and to the Cortex application in case of alarm.
- CAMIN program: local connection and monitoring recording and management of the thermostat through the CAMIN program installed on a local computer.

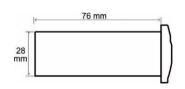

ELECTRICAL DIAGRAM - DIMENSIONS

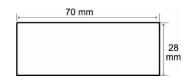

ATTENTION: according to safety standards, the device must be properly positioned and protected from any contact with electrical parts. The device must be fastened in such a way that it cannot be removed without the use of tools. Disconnect the main safety switch of the installation before proceeding to any maintenance. Disconnect the power supply of the device before proceeding to any maintenance. Do not place the device near heat sources, equipment containing strong magnets, in areas affected by direct sunlight or rain. Prevent electrostatic discharges and sharp objects from been inserted to the device. Separate signal cables from power supply cables to prevent electromagnetic disorders. Signal cables must never be in the same pipe with the power supply cables. **ATTENTION**: Read carefully the technical specifications and make sure that the working conditions are appropriate. According to safety standards, the device must be fastened in such a way that it cannot be removed without the use of tools.

Dimensions are in mm. The device is mounted on panel hole with cut 29x71mm and restrained with plastic side brackets.

No		Description	min	max	UOM
1	SPo	SET POINT: room temperature setting	LSP	HSP	°C/°F
2	Cod				units
ANAL	OG INPU	TS - TEMPERATURE			
3	diF	Differential of room temperature SPo (thermostat delay)	0.1	25.5	°C/°F
4	LSP	Lower setting limit of SPo	-50.0	+150	°C/°F
5	HSP	Maximum setting limit of SPo	-50.0	+150	°C/°F
6	dEC	Temperature indication as integer or decimal, where 0 = integer , 1 = decimal	0	1	units
7	Sensor type NTC/PTC			1	-
8	SE1	Room sensor offset	-9.9	+15.5	°C/°F
9	SE2	Evaporator sensor offset			°C/°F
10	tdS	Delay in displaying the actual room temperature on the screen when the door opens	0	255	min
11	 Evaporator's sensor operation 0 = Sensor is OFF and by pressing it is displayed "" 1 = Sensor is ON and by pressing it is displayed evaporator's temperature T2. 2 = Evaporator's sensor is activated, its temperature is displayed on the screen and by pressing room temperature is displayed. Does not affect the operation of the device. 		0	2	units
12	C_F	Temperature measurement unit: toggling between $^{\circ}$ C/ $^{\circ}$ F do not adjust the SPo automatically, it must be changed by the user: $0 = ^{\circ}$ C / $1 = ^{\circ}$ F	0	1	°C/°F
ALAR	MS				
13	ALo	Low room temperature	-50.0	+150	°C/°F
14	AHi	High room temperature	-50.0	+110	°C/°F
15	At2	Time delay in activating "AHi", "ALo" and the buzzer among them. This setting does not apply to sensor failure and door alarm. -1 = OFF buzzer 0 = ON buzzer in case of an alarm	-01	120	min

DIGITA	ΔΙ ΙΝΡΙΙ	T – DOOR SWITCH			
DIGITA	AL INFO	Door switch operation			
		0 = OFF door switch and Virtual door switch			
		1 = NC (normally close)			
16	dLd	2 = NO (normally open)	0 3	3	units
		3 = Virtual door switch. Detects the change in room temperature. The operation of the virtual switch: controls the Eco ,			
		controls the lamp (OAU = 3), does not activate door's ALARM and does not stop the compressor. The duration of defrost			
		dd2 continues and counts normally. If the 1st relay (30A) is in heating operation, then the door control is deactivated. Door ALARM delay time of the real switch	1		
17	Compressor is deactivated - OFF - when there is door ALARM.			250	sec
18	Vdt Retention time of the Virtual switch open door signal			250	sec
